Convenience Even When You're On The Go

The KX-TD7896 proprietary multi-line wireless phone gives you the mobility, clarity and security of 2.4GHz Frequency Hopping Spread Spectrum (FHSS) operation, plus the functionality of a powerful system phone. Just clip the compact handset to your belt or purse and you're ready to receive or make calls from anywhere within range. An essential communications tool for both busy offices and homes, the KX-TD7896 can accommodate as many as 12 CO lines. It also possesses a host of sophisticated features that you can control with the handset's joystick and function buttons.

2.4GHz Frequency Operation

Provides clear sound, enhanced range and reduced interference from radios, computer monitors and fluorescent lighting, compared to ordinary wireless phones.

Frequency Hopping Spread Spectrum (FHSS) Technology

The Panasonic KX-TD7896 cordless phone utilizes Frequency Hopping Spread Spectrum (FHSS) technology in the 2.4GHz band. FHSS technology brings an important benefit to the user: security. Cordless phones with FHSS are more secure than regular cordless phones because they transmit over the entire bandwidth, constantly changing frequency. This constant change, or Frequency Hopping, deters electronic eavesdropping.

Caller ID Compatible¹

The KX-TD7896 can display an incoming caller's phone number or name for effective call screening.

Hands-Free Speakerphone with Auto Answer

The convenient built-in speakerphone, combined with the Auto Answer feature, gives you the freedom to answer and talk hands-free from anywhere within the converge area.

Joystick Navigation Key

This fast and reliable joystick can be used to adjust the handset, speaker and ringer volumes as well as to adjust the contrast of the LCD. Searching through the speed dial and accessing menu options has never been easier or quicker.

Ringer Modes

The KX-TD7896 features 9 different ring melodies and 6 ring patterns to choose from. The vibrator ring is perfect for use in situations when an audible ring would not be desirable.

6-Line Multi-Function Backlit LCD Readout

Provides helpful information like Caller ID¹ data, call information, line status, and flexible key number or name.

Hands-Free Headset Jack

Now there's no need to interrupt your workflow just to answer the phone. You can connect an optional hands-free headset to the KX-TD7896 for automatic answering of intercom calls, plus access to features like BGM and Paging.

Wall-Mountable Base Antenna

You can keep the handset charger cradle on your desk and position the base antenna in a location that is central to your workspace, enabling you to maximize your range within that space.

- High Capacity, Quick-Charging NiMH Battery
- Convenient Belt Clip
- Message Waiting Indicator
- Out of Range Indication
- 7-Day Standby Time; 7-Hour Talk Time
- Lighted Dial Keypad
- Available in Black or Pearl White
